

Somatotypes

Your group is responsible for creating a google document with the following specifications and information.

1. Have one person create the google document and invite the rest of the group.
2. Set permissions to allow all group members to edit the document.
3. The document should list the three somatotypes.
4. Place at least three of the pictures representing the characteristics of the somatotype.
5. List the physical characteristics of this somatotype along with other important disease information of this somatotype.
6. When finished, invite Ms. Schade to the document at a_schade@conradweiser.org.
7. Download the document to your P drive as a word document.
